SAFETY ACCESSORIES

Accessories can help you to enhance safety in your warehouse

PROTECTORS

Ensuring your warehouse is safe and complies with the latest legislation is critical. Dexion can offer you a wide selection of protection for uprights and frames, ensuring your pallet racking is well protected against the impacts from fork lift truck collisions.

Rack end protectors

A robust barrier, ideal for protecting vulnerable areas from forklift truck damage and impacts, a variety of lengths are available, 400mm high.

Shock absorbing protector

Bolted to the front of the racking upright the metal guard offers protection with shock absorbing foam inside.

 For more information see:
www.dexion.co.uk/safety-accessories

Snap on Column Guard

Protect-it™ can absorb large impacts and easily attaches to a column without the need for additional fasteners. 3 pieces each 133mm high, totalling 400mm.

Floor mounted Column Guard

A substantial form of protection for pallet racking uprights, against low level impact.

PROTEX Safety-Barrier-System

Can be used as collision and impact protection for offices, machines, conveyor systems and as a separator. Material thickness: 3 mm.

Corner wheel protector

Specifically designed for protection of uprights placed on corners in the warehouse. A roller at the base helps deflect impacts.

C rail protection barrier

Designed to protect racking, pedestrians, expensive equipment, offices and partition walls. Material thickness: 5 mm. Smooth surface that allows labels to be glued on.

Tubular rack protection

These tubular barriers at 500mm high and made of tough steel are built to withstand the challenges of everyday activities.

Metal Bollards

Metal safety bollards are available either painted or galvanised. Manufactured from robust steel tube, these 164mm diameter barriers are available in a range of heights.

Pallet gate

Used on mezzanines and multi-tier structures this see-saw pivoting pallet gate provides edge protection for pallet movements.

PALLET RACKING ACCESSORIES

Dexion offers you a wide selection of pallet racking accessories for you to create your own tailor-made storage solution.

From pull-out units which enable you to pick from pallets in a safe and ergonomic way, to anti collapse mesh that will prevent goods from falling on warehouse pedestrians, to the humble safety pin which is the key safety accessory.

For more information see:
www.dexion.co.uk/safety-accessories

Cable reel suspension

For storage of large cable reels or carpet rolls. A supporting rod, with high weight capacity, can easily be taken in and out of position.

Anti Collapse Mesh

Anti collapse mesh prevents any risk of spillage from pallets, offering protection for a variety of scenarios.

Wiremesh shelving

Mesh shelves are placed between beams to support damaged or undersized pallets, or boxed goods taken off a pallet for picking.

Tunnel guard

Mesh Shelves are used above tunnel bays to protect against goods falling down.

Pull-out unit

A pull-out unit enables safe and ergonomic handling of goods, directly from the rack, without taking it off the pallets. Load capacity 1000kg.

Pallet support bars

Fixing over the front and rear beams these bars support undersized or damaged pallets.

For more information see:
www.dexion.co.uk/safety-accessories

Sacrificial Leg

A load bearing section is added to the initial 1000mm of an aisle facing upright. A removable piece of upright is then fitted to the front, this is not load bearing and can easily be replaced if damaged, without the need to unload the complete bay.

Pallet stop - vertical & horizontal

A useful safety feature which prevents pallets from falling from the back of the rack.

Load signs

Load signs indicating load capacities must be fitted on all racking and shelving. They must be clearly visible for all users.

Locking pin

Beam locking pins are required in the connector of every beam as they prevent beams being accidentally dislodged.

Drum cradle

Ideal for the storage of cable reels or barrels, preventing rolling and movement.

Drip tray

If liquids might leak, then drip trays may be placed on the floor (or per level). The drip trays are galvanized. Various sizes are available.

Keep your warehouse safe

- By spotting the details that cause damage early

Accidents happen in any warehouse, but regular inspections could minimize the number and effect of them. Dexion's rack inspectors offer a convenient, comprehensive and cost effective way to keep your warehouse safe.

Small changes throughout the year – caused by moving of goods, fitting and refitting of the racks and general knocks through the daily use – can in the end seriously change the capacity of the racks. This can lead to incidents in a warehouse, potentially causing damage to both man and material. The challenge is to spot the changes early enough to avoid additional future costs, which requires the experience of a trained expert who knows what to look for.

Dexion's rack inspectors are fully certified, and highly experienced to conduct yearly inspections to ensure your facilities are kept safe. Following every inspection a detailed report is provided, offering advice and indicating areas that require immediate action or future attention by using a simple traffic light indicator. Each visit is certified and documentation provided that can be clearly displayed on the racks to confirm our inspection.

Our inspections strictly comply with all government guidelines and legislation and any rectification work is fully guaranteed.

Keep your warehouse safe. Let us identify the early signs before it's too late.

The benefits of a Dexion rack inspection:

- Comprehensive professional inspection
- Certified and experienced inspectors
- No interruption to operations
- Detailed inspection report
- Prevention of damage to people or goods
- Extending life span of facilities
- Early risk discovery minimizes future repair costs
- Repair work can be completed quickly
- Provides independent expert to assess equipment

Approval

Adhere to government guidelines legislation and insurance company standards. Following every inspection receive Dexion certification, which is valid for one year.

Load signs

For Dexion manufactured product we can provide each rack with a load sign stating its maximum capacity, which is a legal requirement.

Annual and routine support

Don't worry in case you forget when your inspection is due, our comprehensive records means we can remind you. Any support required between visits is available immediately.

Educating your team

We can provide standard or tailored courses to educate your own people in warehouse safety. Be sure they know what to look for, and how to deal with it every day. Combined with our yearly inspections, this will enhance your safety immensely.
